CS23532-COMPUTER NETWORKS-LAB MANUAL

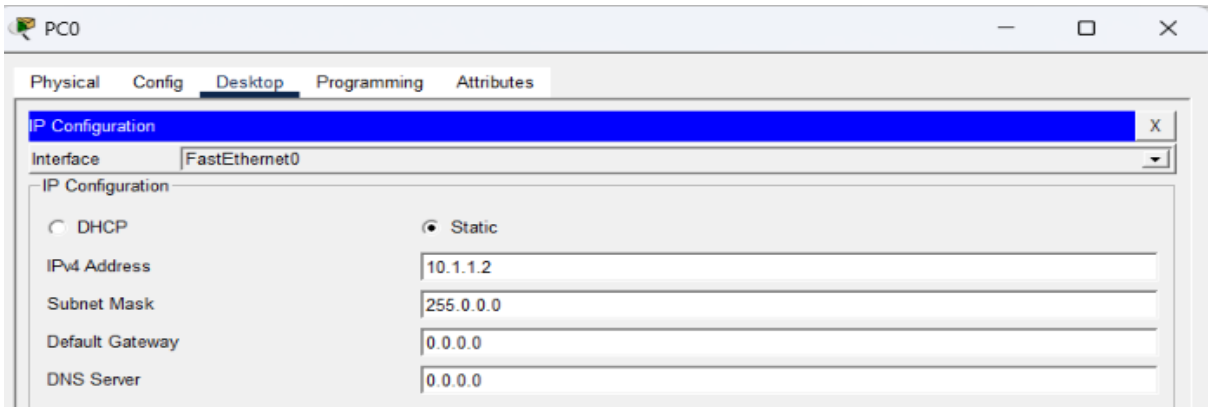

Practical -3

AIM: To study the Packet tracer tool Installation and User Interface Overview

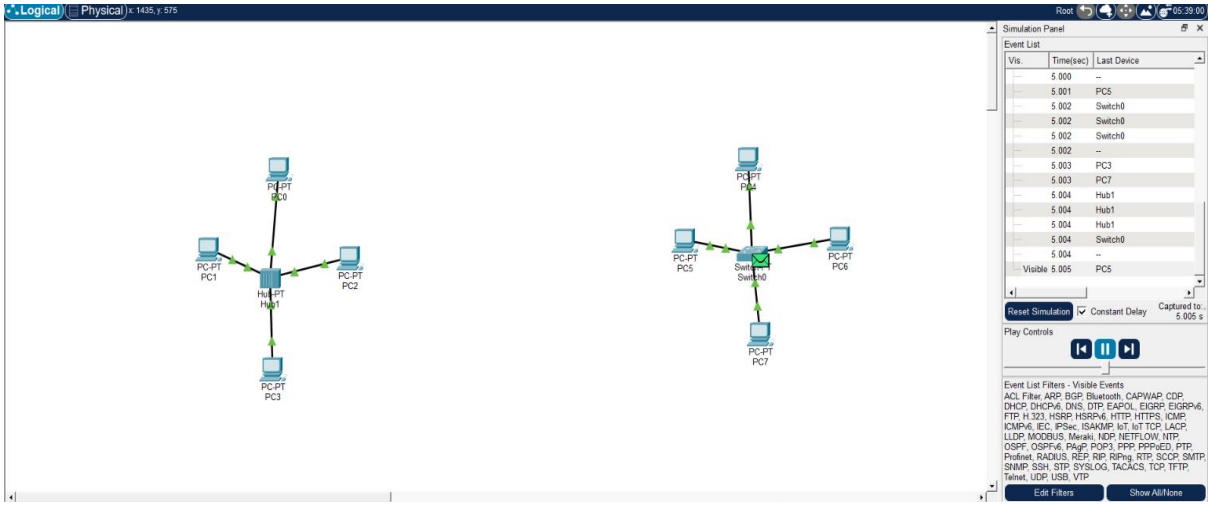

Procedure

1. Open the **Cisco Packet Tracer** application on the computer.
2. Explore the main components of the Packet Tracer interface, such as the workspace, device selection area, and connection tools.
3. Select the required networking devices, including a **Hub, Switch, and computers (PCs)**.
4. Place the devices in the workspace and connect the computers to the Hub using suitable cables.
5. Configure the required **IP addresses** for the connected computers and perform a simulation to test communication.
6. Similarly, connect the computers using a **Switch** and configure the necessary IP addresses.
7. Perform simulations and observe the communication between devices to understand the working of both the **Hub and Switch**.

Result :

Thus the cisco packet tracer app is explored and simulations are done for hub and switch.
