CS23532-COMPUTER NETWORKS-LAB MANUAL

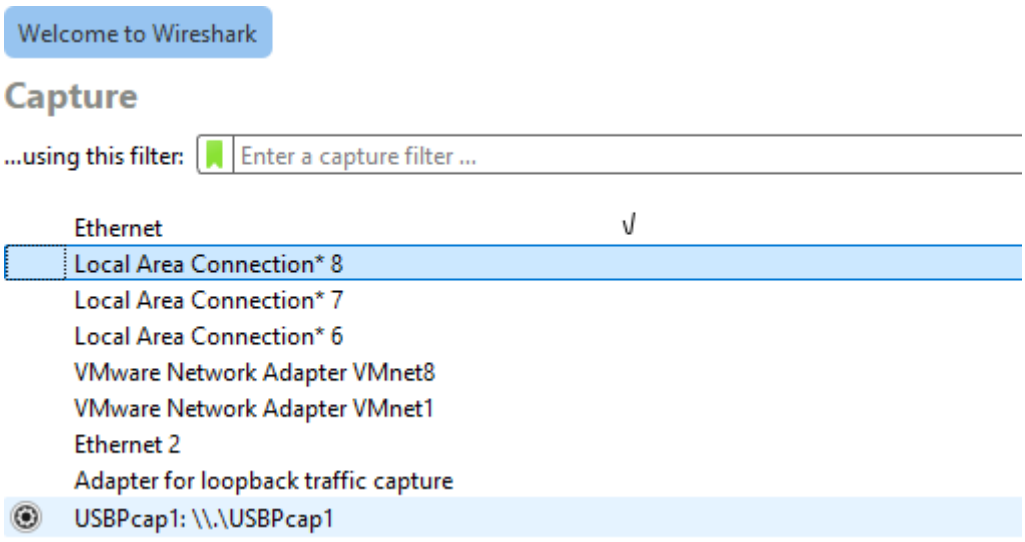

Practical-5

AIM Experiments on Packet capture tool: Wireshark

PROCEDURE

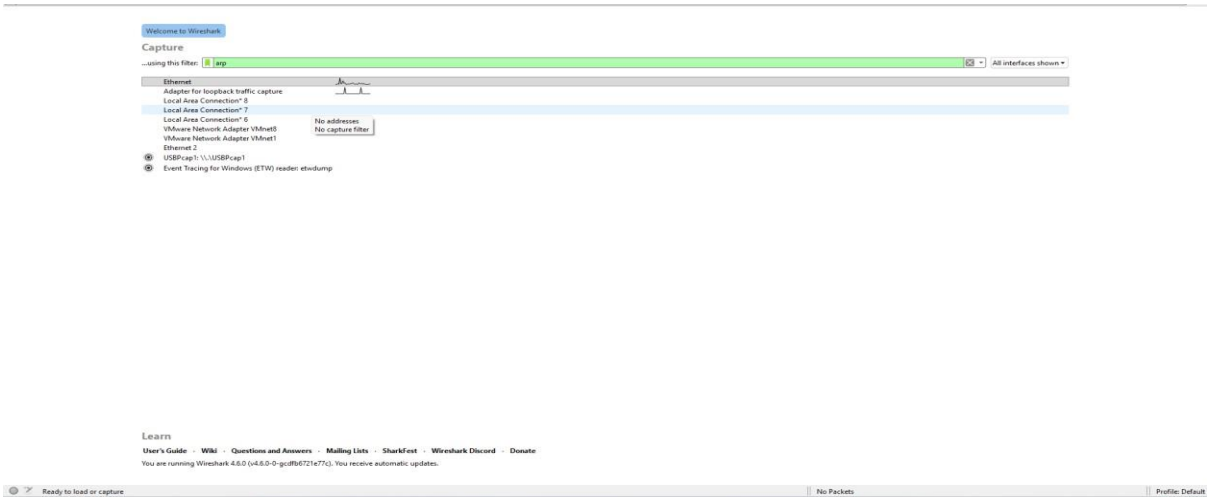

1. Download and install the **Wireshark packet capture tool** on the computer.
2. Open Wireshark and observe the available network interfaces.
3. Select the required active network interface, such as **Wi-Fi or Ethernet**.
4. Start the packet capture process to monitor the network traffic.
5. Generate network activity by browsing a website or performing network communication.
6. Stop the packet capture and observe the captured packets and their details.
7. Apply suitable filters to analyze different network protocols and study the captured network traffic.

Result

Thus, the **Wireshark packet capture tool was successfully used to capture, filter, and analyze network packets transmitted through the selected network interface**.
